PRE.VENT® DSM for Distributed Structure Monitoring in Industrial Assets

The PRE.VENT DSM is a series of controllers for distributed structure monitoring (DSM) that is based on a proprietary Brillouin measurement technology. Its major advantages are the excellent distance range and measurement performance in combination with the passively cooled (fan-less) and maintenance-free industrial design of the PRE.VENT DTS family. It exhibits a superior strain and temperature resolution and accuracy in comparison to other technologies. The excellent performance is achieved in both, single- and double-ended fibre configurations. The OTS4 series is designed for autonomous operation without PC and comprises an internal SSD (solid state drive) for storage of measurement and event data. The DSM series is fully integrated with the Charon4 software suite for easy configuration, long-term data storage and enhanced visualization that also serves the PRE.VENT DTS series. Data from DSM and DTS controllers and other sensors are easily combined in the database to enable an efficient monitoring of complex industrial assets using various sensing systems with different distance range and/or measurands.

The PRE.VENT DSM series simultaneously monitors deformation, cracks, strain and temperature at thousands of locations along the entire length of gas and liquid pipelines, bridges, tunnels, roads, railways, nuclear plants, storage tanks, dams and dykes as well as subsea umbilicals, risers and flowlines. Detection of geohazards (landslide, micro ground movements), load monitoring, structural health monitoring and prevention of any unwanted operation conditions (e.g. undermining by flowing water) are examples of key functions of the structure monitoring system.
**Distance Ranges of DSM Models**

| PRE.VENT DSM-050, -100, -200, -300, -400, -500 | 5 km, 10 km, 20 km, 30 km, 40 km, 50 km |

**Optical Data**

- Optical channels (internal): 1, 2, 3, 4, 6, 8, 9, 12 or 16
- Fibre configuration: No loop or termination required
- Optical connector(s): E2000 / APC
- Fibre types: Single-mode 9/125, e.g. ITU-T G.652, G.655 or G.657
- Laser classification: Class 1M (IEC60825–1), eye-safe wavelength

**Measurement Performance***

- Sampling Interval: 0.25, 0.5 or 1 m
- Spatial resolution: 1, 2, 3 or 5 m
- Temperature resolution @ 10dB optical loss: < 1°C
- Strain resolution, minimum: ≤ 2µε
- Strain resolution @ 10dB optical loss: ≤ 20µε
- Temperature accuracy: 2°C**
- Measurement time: 1 to 20 min

* Measurement performance parameters are interdependent
** after calibration on a loose fibre without strain

**Data Storage / Communication / Interfaces**

- Internal SSD storage: 8, 16, 32 or 64 GB
- Communication interfaces: 2x Ethernet TCP/IP, USB, (optional: WLAN, GSM)
- Communication protocols (options): XML, MODBUS, DNP3, IEC60870, IEC61850
- Programmable inputs / outputs: 20 inputs / 12 outputs
- Fixed outputs: 4/10
- I/O board (optional***): 4 inputs / 12 outputs
- Analogue sensors interface board (optional***): 4x Pt100, 2x 0(4)-20mA and 2x 0-10V
- Analogue outputs (optional external module): 2x 20mA and 2x 0-20mA

*** 2 optional internal boards can be installed in total

**Mechanical Data**

- Rack space: 19-inch rack, 3 height units
- Dimensions (H x W x D): 13.3 x 43.9 x 40.3 cm
- Weight: 15kg

**Electrical Data**

- Power consumption, max. / DC / AC options: 40 W / 45 W
- Operating voltage (DC-1 option): 12 ... 24 V DC (-15% /+10%)
- Operating voltage (DC-2 option): 24 ... 48 V DC (-15% /+10%)
- Mains voltage (AC option): 100 ... 240 V AC 50..60 Hz / 110 ... 220 V DC (-15% /+10%)

**Environmental Conditions**

- Storage temperature: -40°C to +85°C
- Operating temperature: -10°C to +60°C
- Humidity (relative): ≤ 95% (non-condensing)
- Protection class (IEC 60529): IP51

**Conformity to Standards**

- Electrical safety: IEC/UL 61010–1, LV directive 2014/35/EC, CAN/CSA-C22.2
- EMC***: EN61326-1, EN61000-6-2,3,-4-2,3,4,5,6,8,11,-3-2,3, FCC 47 CFR Ch.1 Part15
- Hazardous substances, waste: RoHS directive 2011/65/EC, WEEE directive 2002/96/EC
- Environmental testing**: IEC 60068–2–6,14,27,30
- Functional safety (IEC61508)**: Hardware design compliant to Safety Integrity Level SIL2
- Explosion safety (option)**: EX II (1) G [Ex op is T4 Ga] III(C) / I (M1) [Ex op is Ma]

**Prevent Hazards in Industrial Assets**
